

## Successful Stories

Our Kumon center is proud to retain 12% of students in Math Level J and above. In September 2005, the center had two students complete the whole Kumon Reading Program and both were ranked number one in 7th and 8th grade, respectively. We are very proud to see our students achieve high regard, and their parents were willing to give us their great testimonies. Here is one testimony.

"My 13-year-old daughter Rebecca began her Kumon Math journey at the age of 8. She has enrolled in the Middletown Kumon Center for two reasons: First, her math program at her school was not challenging enough. Second, the Kumon Instructor – Mrs. Li-Hwa Lee has a long-standing reputation as a loving and experienced Instructor at Middletown Kumon Center. Since her enrollment, Rebecca has progressed from Level 2A to Level K."

"Rebecca's Kumon journey has been rewarding but was not without difficulty. She was contemplated to quit at Level D due to the required speed and accuracy of the long division. Fortunately, Rebecca was able to overcome the hurdle with the guidance, patience, and encouragement of the Center Instructor - Mrs. Lee."

"Proceeding to K and beyond, Rebecca is reaching the full benefits of the Kumon math program. She is a "talented math student" at her Holmdel Middle School and has recently won the 8th place at the CBA math competition." - From Mrs. W. 7/2005
